

Certified Economic Analysis Model

Version 2.0.1 - For Pathfinders Only

Version 2.0.1 for Pathfinders is now available and includes updated features such as:

1. Ability to accept alternate proposals.
2. Ability to accept variable study periods.
3. Ability to accept an existing component without a replacement component or a replacement component without an existing component.
4. More user input checks.
5. Updated inflation and discount rates.
6. Easy transfer of existing model (any previous Pathfinder version) data to this new model (5-10 minutes).
7. Government Cost Estimate will change slightly because of the updated inflation and discount rates.

Version 3.1 - For Non-Pathfinders

Version 3.1 is available for non-pathfinders and includes all Pathfinder features and updated features such as:

1. A new 2001 UNIT COST database.
2. A new Table 1a, Summary of Bid, created by the model.
3. A revised Table T3, Status Quo Operating Cost Input, format.
4. A revised Table T4, Inventory, with the ability to accept separate trenching requirements for existing and replacement inventory items.
5. A revised Table T5, Renewals and Replacements, with more input checks.
6. A revised Table T6, Life Cycle Cost - Status Quo, that shows Capital Upgrades separately.
7. A revised Table T8, Air Force, with changed Transition calculations base on Final Draft OSD Guidance.
8. An added Extra Worksheet for user calculations.
9. Upper and Lower bounds for the Status Quo in the Cumulative Present Value chart.
10. A new DISPLAY UNIT COST USED function that allows the user to display and print only those UNIT COST database items used in the T4 - Inventory.
11. Easy transfer of data from previous Non-Pathfinder models. (Transfer of data from Pathfinder models requires additional effort.)

If you would like to receive a copy of either of these models, please contact:
